Models

User

Field	Type	Description
id	String	Unique identifier for the user.
version	Int	Version of the user record.
email	String	User's email address, must be unique.
name	String	User's first name.
lastName	String	User's last name.
role	String	User's role (e.g., "ADMIN", "PROFESSOR", "QUALITY_MANAGER").
status	Status	Current status of the user (e.g., ACTIVE, INACTIVE). Default is ACTIVE.
createdAt	DateTime	Timestamp of when the user record was created.
updatedAt	DateTime	Timestamp of the last update to the user record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.

Relations		academicLoads, workloadTimes, repitencyCourses, projectAssignments, externalWorkloads, evidenceChangeHistory
------------------	--	--

Career

Field	Type	Description
id	String	Unique identifier for the career.
version	Int	Version of the career record.
name	String	Name of the career.
description	String?	Optional description of the career.
code	String	Unique code for the career.
status	Status	Current status of the career. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the career record was created.
updatedAt	DateTime	Timestamp of the last update to the career record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		curriculums, academicLoads, evidenceDocuments

Course

Field	Type	Description
id	String	Unique identifier for the course.
version	Int	Version of the course record.
code	String	Unique code for the course.
name	String	Name of the course.
description	String?	Optional description of the course.
status	Status	Current status of the course. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the course record was created.
updatedAt	DateTime	Timestamp of the last update to the course record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		curriculumCourses

AcademicCycle

Field	Type	Description
id	String	Unique identifier for the academic cycle.
version	Int	Version of the academic cycle record.
year	Int	Year of the academic cycle.
period	Int	Period within the year (e.g., 1 for first semester, 2 for second).
startDate	DateTime	Start date of the academic cycle.
endDate	DateTime	End date of the academic cycle.
status	Status	Current status of the academic cycle. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the academic cycle record was created.
updatedAt	DateTime	Timestamp of the last update to the academic cycle record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		academicLoads, workloadTimes, repitencyCourses, projectAssignments, externalWorkloads

Curriculum

Field	Type	Description
id	String	Unique identifier for the curriculum.
version	Int	Version of the curriculum record.
name	String	Name of the curriculum.
description	String?	Optional description of the curriculum.
year	Int	Year of the curriculum.
isActive	Boolean	Indicates if the curriculum is active.
careerId	String	ID of the associated career.
status	Status	Current status of the curriculum. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the curriculum record was created.
updatedAt	DateTime	Timestamp of the last update to the curriculum record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		career (one-to-many from Career), curriculumCourses

CurriculumCourse

Field	Type	Description
id	String	Unique identifier for the curriculum course association.
version	Int	Version of the curriculum course record.
contactHours	Int	Number of contact hours for the course in this curriculum.
level	Int	Level of the course in this curriculum.
semester	Int	Semester in which the course is taken.
independentHours	Int?	Optional independent study hours.
credits	Int	Credits for the course in this curriculum.
curriculumId	String	ID of the associated curriculum.
courseId	String	ID of the associated course.
status	Status	Current status of the curriculum course. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the curriculum course record was created.
updatedAt	DateTime	Timestamp of the last update to the curriculum course record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		curriculum (one-to-many from Curriculum), course (one-to-many from Course), repitencyCourses

AcademicLoad

Field	Type	Description
id	String	Unique identifier for the academic load.
version	Int	Version of the academic load record.
professorId	String	ID of the associated professor (user).
careerId	String	ID of the associated career.
academicCycleId	String	ID of the associated academic cycle.
totalWorkload	Float	Total academic workload assigned to this professor in this career and cycle.
status	Status	Current status of the academic load. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the academic load record was created.
updatedAt	DateTime	Timestamp of the last update to the academic load record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.

Relations		professor (one-to-many from User), career (one-to-many from Career), academicCycle (one-to-many from AcademicCycle), workloadTimes
------------------	--	--

WorkloadTime

Field	Type	Description
id	String	Unique identifier for the workload time.
version	Int	Version of the workload time record.
academicLoadId	String	ID of the associated academic load.
professorId	String	ID of the associated professor (user).
academicCycleId	String	ID of the associated academic cycle.
calculatedTime	Float	Calculated time for this workload.
assignedTime	Float	Assigned time for this workload.
additionalTime	Float	Additional time for this workload. Default is 0.
additionalReason	String?	Reason for additional time.
status	Status	Current status of the workload time. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the workload time record was created.
updatedAt	DateTime	Timestamp of the last update to the workload time record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		academicLoad (one-to-many from AcademicLoad), professor (one-to-many from User), academicCycle (one-to-many from AcademicCycle)

RepitencyCourse

Field	Type	Description
id	String	Unique identifier for the repitency course.
version	Int	Version of the repitency course record.
enrolledStudents	Int	Number of enrolled students.
startDate	DateTime	Start date of the repitency course.
endDate	DateTime	End date of the repitency course.
workloadTime	Float	Workload time for the repitency course.
observations	String?	Observations about the repitency course.
academicCycleId	String	ID of the associated academic cycle.
curriculumCourseId	String	ID of the associated curriculum course.
professorId	String	ID of the associated professor (user).
status	Status	Current status of the repitency course. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the repitency course record was created.
updatedAt	DateTime	Timestamp of the last update to the repitency course record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		academicCycle (one-to-many from AcademicCycle), curriculumCourse (one-to-many from CurriculumCourse), professor (one-to-many from User)

InstitutionalProject

Field	Type	Description
-------	------	-------------

id	String	Unique identifier for the institutional project.
version	Int	Version of the institutional project record.
title	String	Title of the project.
description	String	Description of the project.
code	String	Unique code for the project.
projectType	ProjectType	Type of the project (e.g., RESEARCH, EXTENSION).
startDate	DateTime	Start date of the project.
endDate	DateTime	End date of the project.
status	Status	Current status of the institutional project. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the institutional project record was created.
updatedAt	DateTime	Timestamp of the last update to the institutional project record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		projectAssignments

ProjectAssignment

Field	Type	Description
id	String	Unique identifier for the project assignment.
version	Int	Version of the project assignment record.
role	String	Role in the project.
workloadTime	Float	Workload time assigned to this project.
startDate	DateTime	Start date of the assignment.
endDate	DateTime?	End date of the assignment.
projectId	String	ID of the associated institutional project.
professorId	String	ID of the associated professor (user).
academicCycleId	String	ID of the associated academic cycle.
status	Status	Current status of the project assignment. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the project assignment record was created.
updatedAt	DateTime	Timestamp of the last update to the project assignment record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		project (one-to-many from InstitutionalProject), professor (one-to-many from User), academicCycle (one-to-many from AcademicCycle)

ExternalWorkload

Field	Type	Description
id	String	Unique identifier for the external workload.
version	Int	Version of the external workload record.
providerName	String	Name of the external workload provider.
amount	Float	Amount of the external workload.
certainty	WorkloadCertainty	Certainty of the workload (FIXED or UNCERTAIN).
observations	String?	Observations about the external workload.
referenceCode	String?	Optional reference code for the external workload.
professorId	String	ID of the associated professor (user).
academicCycleId	String	ID of the associated academic cycle.
status	Status	Current status of the external workload. Default is ACTIVE.

createdAt	DateTime	Timestamp of when the external workload record was created.
updatedAt	DateTime	Timestamp of the last update to the external workload record.
createdBy	String?	ID of the user who created this record.
updatedAt	String?	ID of the user who last updated this record.
Relations		professor (one-to-many from User), academicCycle (one-to-many from AcademicCycle)

Dimension

Field	Type	Description
id	String	Unique identifier for the dimension.
version	Int	Version of the dimension record.
code	String	Unique code for the dimension.
name	String	Name of the dimension.
description	String?	Optional description of the dimension.
order	Int	Order of the dimension.
status	Status	Current status of the dimension. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the dimension record was created.
updatedAt	DateTime	Timestamp of the last update to the dimension record.
createdBy	String?	ID of the user who created this record.
updatedAt	String?	ID of the user who last updated this record.
Relations		components

Component

Field	Type	Description
id	String	Unique identifier for the component.
version	Int	Version of the component record.
code	String	Unique code for the component.
name	String	Name of the component.
description	String?	Optional description of the component.
order	Int	Order of the component.
dimensionId	String	ID of the associated dimension.
status	Status	Current status of the component. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the component record was created.
updatedAt	DateTime	Timestamp of the last update to the component record.
createdBy	String?	ID of the user who created this record.
updatedAt	String?	ID of the user who last updated this record.
Relations		dimension (one-to-many from Dimension), criteria

Criterion

Field	Type	Description
id	String	Unique identifier for the criterion.
version	Int	Version of the criterion record.
code	String	Unique code for the criterion.
name	String	Name of the criterion.
description	String?	Optional description of the criterion.
order	Int	Order of the criterion.
componentId	String	ID of the associated component.
status	Status	Current status of the criterion. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the criterion record was created.
updatedAt	DateTime	Timestamp of the last update to the criterion record.

createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		component (one-to-many from Component), evidenceCriteria

EvidenceDocument

Field	Type	Description
id	String	Unique identifier for the evidence document.
version	Int	Version of the evidence document record.
title	String	Title of the document.
description	String?	Optional description of the document.
fileType	String	Type of the file (e.g., PDF, DOCX).
fileSize	Int	Size of the file in bytes.
fileName	String	Name of the file.
driveFileId	String	Unique ID of the file in Google Drive.
driveFileLink	String	Link to the file in Google Drive.
year	Int	Year the evidence pertains to.
month	Int?	Optional month the evidence pertains to.
keywords	String[]	List of keywords for the document.
careerIds	String[]	IDs of associated careers.
status	Status	Current status of the evidence document. Default is ACTIVE.
createdAt	DateTime	Timestamp of when the evidence document record was created.
updatedAt	DateTime	Timestamp of the last update to the evidence document record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		careers (many-to-many with Career), evidenceCriteria , changeHistory

EvidenceCriterion

Field	Type	Description
id	String	Unique identifier for the evidence criterion association.
version	Int	Version of the evidence criterion record.
notes	String?	Optional notes for this association.
evidenceId	String	ID of the associated evidence document.
criterionId	String	ID of the associated criterion.
createdAt	DateTime	Timestamp of when the evidence criterion record was created.
updatedAt	DateTime	Timestamp of the last update to the evidence criterion record.
createdBy	String?	ID of the user who created this record.
updatedBy	String?	ID of the user who last updated this record.
Relations		evidence (one-to-many from EvidenceDocument), criterion (one-to-many from Criterion)

EvidenceChangeLog

Field	Type	Description
id	String	Unique identifier for the evidence change log.
version	Int	Version of the evidence change log record.
action	String	Action performed (e.g., "created", "updated", "deleted").

<code>description</code>	<code>String</code>	Description of the change.
<code>previousState</code>	<code>Json?</code>	Optional JSON representation of the previous state.
<code>newState</code>	<code>Json?</code>	Optional JSON representation of the new state.
<code>evidenceId</code>	<code>String</code>	ID of the associated evidence document.
<code>userId</code>	<code>String</code>	ID of the user who made the change.
<code>createdAt</code>	<code>DateTime</code>	Timestamp of when the change log record was created.
Relations		evidence (one-to-many from EvidenceDocument), user (one-to-many from User)
